# ADVANCES IN IMPLANT-SUPPORTED OVERDENTURE THERAPY

## COURSE SUMMARY:

This lecture will highlight an alternative treatment for an immediate fixed full-arch restorative solution designed to save you time, while relieving you of the burden of delivering a screw-retained prosthesis. Review fixed full-arch guidelines for cantilevers, primary stability and immediate loading. The topics of provisionalization, final prosthesis design and material selection, prosthesis removal, and maintenance will be covered.

## LEARNING OBJECTIVES:

- Learn how to achieve esthetic results by eliminating the need for screw access channels
- Learn to deliver a stronger provisional restoration preventing some of the common complications that occur with screw-retained provisional restorations
- Review tips and tricks for predictable outcomes
- Understand the pros and cons of removable vs. fixed implant restorations

## PRESENTERS:

**Patrick Francis** received his Bachelor of Science in Business and his Associate Degree in Dental Technology in 1985 from Southern Illinois University. He began his career in product management for two separate dental manufacturers. He conducted multiple national training lectures on model and die fabrication. His business development and technical training skills led him to an opportunity where he created the first implant training program for large group dental practices.

Over the past 15 years he has specialized in implant retained denture protocols. He has worked chair side with hundreds of clinicians and patients to coordinate surgical, laboratory and clinical delivery of implant prostheses.

### **Gary Blevins, CDT**

Gary Blevins is Director of Education and Training with Sherer Dental Laboratory in Rock Hill, SC. He is a graduate from Wayland Baptist University and the community college of the Air Force in Dental Technology. His career spans 37 years in the dental lab industry, including 20 years as a Lab Technician with the U.S. Navy, Laboratory technician for the Naval Prosthodontic Post Graduate School, curriculum writer and instructor for the Armed Forces Tri-Service Dental Laboratory School. Through extensive hours of treatment planning, Gary understands the needs of the dentist, the staff, and how to communicate those needs to the laboratory.
