

SHERER EDUCATION PROGRAM

FLEXIBLE PARTIAL SOLUTIONS

PROGRAM OVERVIEW:

For the past 20 years, flexible partials have become a restoration of choice for the partially edentulous patient. The esthetic and comfort value they provide are at the forefront of patient satisfaction and will continue to be a viable option for clinicians as the removable patient population grows. The TCS Thermoplastic material offers unique physical and esthetic properties, biocompatibility, life-like esthetics, and flawlessly blends with the patient's natural tissue and surrounding dentition. The injection process provides ideal adaptation to both hard and soft tissues allowing restorations to adjust to the contours of the mouth.

COURSE OBJECTIVE:

This Sherer Education Program is designed to provide the attending dentists with a review of the most recent dental materials, equipment, techniques, and procedures used in the fabrication of flexible partials. The information presented will enable the attendees to more effectively determine which materials, products, and techniques will best assist them in the treatment of patients. As always, we will give you this information in a no-nonsense, straightforward method – programs are very relaxed, informal, and fact-filled.

Thursday, April 25, 2019
5:30 pm – 8:00 pm

Sherer Dental Lab
1145 Camden Avenue
Rock Hill, South Carolina

SPEAKER:

Elvis Rosado owns and operates Matrix Dental Laboratory in Valley Stream, NY, a boutique operation specializing exclusively in removable thermoplastic partials. Elvis began his career in the dental industry in 1977 at Master Touch Dental Laboratory in Long Island City, NY. He was one of the original technicians that worked in a production laboratory fabricating thermoplastic partials. He introduced the concept of the flexible partial to the Military and trained master technicians at Peterson Air Force Base. Elvis is a consultant, lecturer, and hands-on instructor for TCS. He has traveled across the United States and Europe teaching and sharing his expertise on TCS resins.
